DRAYTON VALLEY
'Pulling Together'

THE WATER CONSUMPTION REDUCTION PROGRAM - COMMERCIAL

Replace your old water-guzzling fixtures and appliances with the water efficient types listed below and not only will you get money back, but you'll save on your water bill and help to preserve our ultimate resource!

This program will run for the 2016 calendar year, meaning that all water consumption reducing installations must be completed before December 31st to qualify.

The program applies to any and all institutional, commercial and industrial buildings connected to Town water service that choose to install approved water saving devices which reduce the amount of water consumed in those buildings. These devices are:

- WaterSense certified toilets (low flush, dual flush, waterless)
- WaterSense certified urinals (low flush, waterless)
- Water pressure reducers
- Energy Star (high efficiency) washing machines
- Rain Barrel Systems (conditions apply)
- Energy Star (high efficiency) dishwashers

For up to 10 units installed, the utility account holder for the business will be given a credit of \$100 on their Town utility bill; installations of more than 10 units, in groups of 10, will qualify for an additional credit.

In order to receive these credits, account holders must provide the Town with proof of purchase and installation of the devices (eg. store receipt and tradesperson's receipt), along with the attached form completed with their information, including a valid Town utility account number. If necessary, to verify the installation of a device, the applicant must agree to arrange for access to the residence to Town personnel.

“By reducing your facility's water use, and by using water wisely, you can save money -- a savings of up to 30% of your water bill is probably within your grasp. You can also help improve our environment.” - Environment Canada
