Department:	Engineering
Presented by:	Councillor Fredrickson
Support Staff:	Dwight Dibben, CAO

BACKGROUND:

The Town of Drayton Valley issued a Request for Proposal (RFP) for Curbside/Roadside Collection and Disposal of Recyclables and Waste on October 20, 2016 and closed on November 10, 2016. The timing of the issuance and closing of the RFP was done in consideration of the current contract for the service expiring on December 31, 2016.

The compliant proposals have been assessed and evaluated based on the RFP requirements and Waste Management Policy directions previously approved by Council. These Policy directions include but are not limited to:

- diversion of materials;
- decreases in traditional landfilling operations footprint;
- greater public participation; and
- maintaining current waste management budgets.

Pursuant to the Town's Purchasing and Tendering Policy, Administration is requesting Council approval to enter into a contract for Curbside/Roadside Collection and Disposal of Recyclables and Waste with a service provider for a term of up to five (5) years, for a total cost over the term not to exceed \$1,650,000.00, plus GST, commencing January 1, 2017.
